

Screw conveyor

"Advanced technological systems for chemical and food industry"

Application:

Screw conveyors are used for conveying all sorts of materials (mainly loose) horizontally or at an angle. The conveyors can either work independently or can cooperate with other devices.

Advantages

Screw conveyors are one of the most traditional ways of conveying materials. High tightness of transport is guaranteed. The screw conveyors we offer are characterized by long life.

Description

We produce screw conveyors in various versions:

- a) the body
 - trough
 - pipe
- b) the shaft
 - full
 - band
 - blade
 - dosing

Technical data:

The conveyors are available in their traditional versions but we produce atypical devices as well.

The length and the construction of the conveyor are decided on the basis of parameters and the information about the product provided by the customer.

Offered devices can differ from presented on the photos.
