

# Containers

"Advanced technological systems for chemical and food industry"

## Application:

The containers are designed for storing and internal conveying of raw materials in process lines in food, chemical and agricultural industry.

## Advantages

Acid-resistant. Simple construction. Small weight. Easy to keep hygienic. Flat surfaces and rounded edges enable washing. Affordable prices.

## Description

The containers are made of 2 mm acid-resistant sheet strengthened at sides by angles.

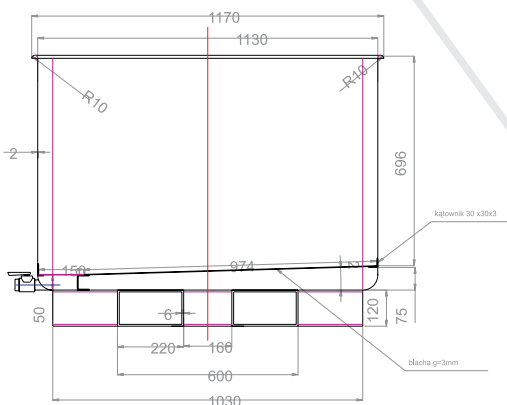

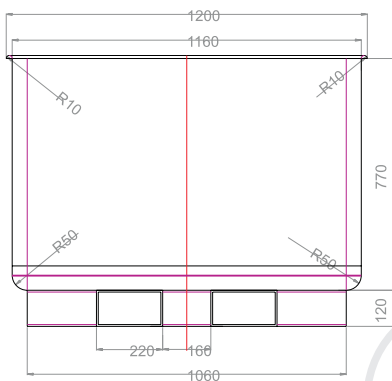

The containers designed for storing wet products are equipped at the bottom with sieves and a drain valve. The bottom sloped in the direction of the valve enables water outlet. The presence of the skids under the containers makes it possible for them to be transported by fork-lift trucks.

The containers are designed to work with fork-lifted trucks.

## Technical data:

Capacity of containers – 1 m<sup>3</sup>

\*The size of containers can be customized

Offered devices can differ from presented on the photos.
